

Veneer Cutter

AN

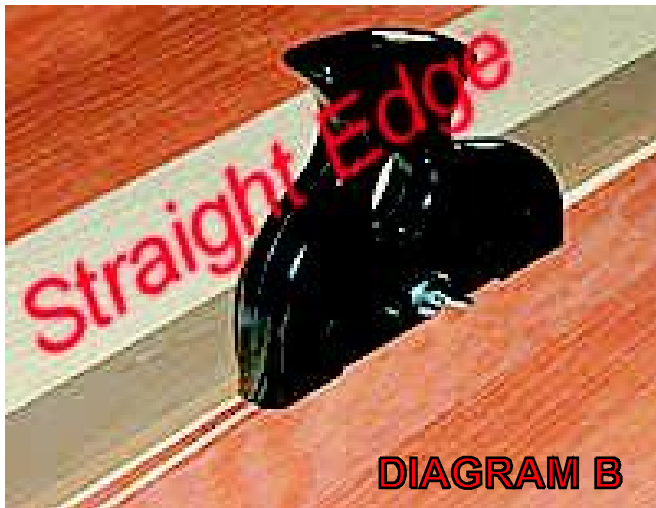

10/10/05 - Veneer Cutter.cdr

The veneer cutter is a light weight handy tool for cutting all kinds of veneer up to 1 mm thick. By turning the blade all four corners can be used one after the other. This means optimum use of the blade. The veneer cutter is delivered with mounted fence and ready for operation.

For edge trimming leave the fence on and follow diagram A.

For veneering cutting take off fence and look at diagram B.
